

Environmental Policy

The Kingsmills Hotel recognise that we are responsible for achieving good environmental practices throughout our hotel and operate in a sustainable manner where feasible.

We are therefore committed to reducing negative environment impact of our business and continually improving our environmental performance, making it an integral and fundamental part of our business strategy and operating methods. Employees are actively encouraged to understand our environmental policy and engage in best practises across our hotel. We will continue to initiate, control and reduce consumption of energy and we remain committed to install energy efficient equipment as and when required.

Craig Ewan
General Manager

We will:

- Implement sound environmental practices in the operations of our hotel.
- Where possible we will inform our guests about the differences they can make by saving energy, water, the use of products, towels and services without impacting on their comfort during their stay.
- Continue to educate and involve employees in the implementation of this policy with an aim for greater commitment and improved environmental performance.
- Kingsmills Hotel will monitor and work to reduce its contribution to environmental emissions from travel undertaken for business purposes.
- Work with suppliers and contractors who share our commitment and have compatible policies for managing their impact on the environment.
- Consumption of energy, water usage and waste will be recorded throughout our hotel and regularly audited and evaluated to ensure that objectives and targets for reduction are determined.
- Manage waste generated from our hotel, continue to recycle where possible and reduce the percentage of our waste going into landfill.
- Kingsmills Hotel will have a proactive and positive attitude to environmental issues and will review our Environmental Policy on an annual basis.
- Items we recycle include, Aluminium/tin cans, cardboard, cooking oil, batteries, light bulbs, glass and food.
- Our food waste is recycled into compost which we purchase back from Keenan Recycling to nourish our gardens.
